## Education

---

North Carolina State University, Raleigh, NC

May 2026

Bachelor of Science in Computer Science, *Magna Cum Laude*

Goodnight Scholars Program — Full-Ride Merit Scholarship

## Skills

---

**Languages:** C, Java, Python, JavaScript, TypeScript, HTML/CSS, Go, SQL

**Databases:** MySQL, PostgreSQL, MongoDB, Oracle

**Frameworks & Libraries:** React, Node.js, Express, Nuxt, Quarkus, GraphQL, Bootstrap

**Tools & Platforms:** AWS, Docker, Git, GitHub Actions, Jenkins, Postman, Linux

## Experience & Projects

---

### Blue Cross Blue Shield — User Management System

Senior Capstone, Sponsored | Spring 2026

- Developed a full-stack user management system with responsive UI to manage subscriber and dependent data using Nuxt and Quarkus
- Designed and integrated RESTful APIs to handle efficient data retrieval and updates for enterprise-scale user records
- Integrated a Groq AI-powered support feature into the frontend with a custom system prompt enforcing business logic rules, providing users with contextual navigation and workflow assistance
- Optimized search workflows and backend queries to improve data lookup performance

### Leave a Message — Audio Guestbook Business

Freelance & Entrepreneurship | Ongoing

- Engineered a custom audio recording system using C and a Teensy microcontroller, implementing handset detection, prerecorded greeting playback, and low-latency audio capture with file I/O and debouncing logic
- Launched a small business renting the device for weddings and events, handling real client engagements
- Built a client-facing website with contact and inquiry functionality using HTML, CSS, and JavaScript

### Flick — Interactive Mobile App

Indie Development | In Development

- Designing and building a mobile application featuring a custom swipeable interface with touch-based gesture navigation, drag physics, and animated UI feedback using React
- Engineered 15+ modular interactive "world" components with real-time responsiveness
- Implemented social engagement features including likes, comments, and sharing

### Full Stack Projects

Personal | 2025-2026

- Built a social media platform with dynamic feeds, user profiles, and engagement features (likes, comments, shares) using React, Node.js, and MongoDB
- Developed a secure peer-to-peer payment application with Stripe API integration, user authentication, and fraud prevention via user blocking (React, Node.js, Express)

## Leadership

---

**Goodnight Transfer Mentor & Outreach Ambassador:** Mentor CS/STEM transfer students and represent NC State at community college outreach events through the Goodnight Scholars Program
